ENHANCED INCIDENT MANAGEMENT/ UNIFIED COMMAND

MGT-314

The EIMUC course uses a computer-driven simulation to train participants in incident management skills, staff responsibilities, situational awareness and decision-making skills particular to CBRNE events. The course focuses on the Incident Command Post (ICP) and the key decision-making requirements within that response node.

The overall incident management structure used in the course is based on the National Incident Management System (NIMS) and the National Response Plan (NRP) and is certified by the DHS Office of Grants and Training (G&T).

Training Level:

Planning/Management

Venue:

Emergency Operations Training Center (EOTC)
College Station, Texas

Course Length:

28 hours (Three and ½ days)

Participant Audience:

Eligible participants include emergency responders who serve in a management or supervisory role and may be required to perform incident command or general staff functions for a jurisdiction during the response to a CBRNE incident. Disciplines include:

- Law Enforcement
- Emergency Medical Services
- Emergency Management
- Fire Service
- Hazardous Materials
- Public Works
- Governmental Administrative
- Public Safety Communications
- Health Care
- Public Health

Prerequisites:

Participants must be supervisors or managers in one of the above G&T emergency responder disciplines/ services and possess a working knowledge of the ICS. Participants must have completed the MGT-313 IM/UC course, the FEMA Intermediate Incident Command System Course or higher course, or equivalent incident management and unified command course. Experience and job position will also be considered.

Class Size:

The course is designed for a maximum of 40 participants.

“Every attendee of this course had told us what a beneficial, hands-on course that it was; but the course turned out to be even better than we envisioned. The unique opportunity to be able to come together to gain more knowledge of incident command/unified command structure allowed for some real hands-on type training.”
